APG Colloquium Summary

Keynote Address by Senator Whitehouse

“this type of (middle of the pack) policymaking fails to drive and reward the change we need in our healthcare system.
...Feed the lead dogs... Need to reward the leader”

Video from the APG Colloquium

Understanding Diabetes in the Hispanic Community – Research Project

- In the U.S., 12.8% people aged ≥ 20 years with diagnosed diabetes are Hispanics, 7.6% are non-Hispanic Whites
- Research shows that Hispanics were significantly less likely than non-Hispanic Whites to take medicine to lower cholesterol, but were more likely to test their blood glucose regularly in an older California sample

Latino Type II Diabetic Quality Improvement Program

- Objective: to improve health outcome of culturally diverse patient populations with type II diabetes through the mutually agreed upon resource interventions
 - Improve patient activation
 - Increase the Health Care Team (HCT) cultural awareness
 - Enhance HCT-patient communication
- This program is intended to improve patient health outcomes by utilizing Merck informational resources that support both patient and HCT education
